

Coming Soon: Mathcad 15.0!

When you **re-activate Maintenance Support**, you're **automatically entitled** to:

- **Mathcad 15.0** – scheduled for release in June 2010, includes:
 - **Design of Experiments (DoE)** - DoE functions and plot enhancements can be used for constructing experimental design matrices, for analyzing and screening factors, and for developing statistical models. DoE helps you identify critical factors and optimal settings for your complex process. It provides templates for fewer number, yet statically more intelligent experiments, which are indispensable when you have multiple variables and levels thus saving time and lowering cost.
 - **Truenumbers** - Enables the ability to easily communicate values across applications and the organization without loss of quantity or unit integrity.
 - **Windows 7** and Excel 2007 Support
 - **Technical Engineering Reference Information** - Direct connection to FREE reference content from Knovel (10 downloads), including fully documented Mathcad worksheets (Knovel Math) to reduce the time it takes to solve your complex math problems.

"Knovel saves me time and effort by bringing together the many resources I need in one quick and easy-to-use reference."

– Process Engineer, Chevron

- **Mathcad Prime 1.0** – scheduled for release in late 2010, includes:
 - **New design, look-and-feel**
 - **Improved usability and "learnability"**
 - *New communication and collaboration capabilities - spend less time documenting and more time engineering*
- **Additional Licenses at No Extra Cost**
 - 2 Home Use Licenses for every 1 seat
- **Update Training** – ensure a smooth transition from your current release
